footprints in the mind is a collection of short stories in two parts i was tempted to call the stories footprints in the sand but on reflection i realized that footprints in sand do not last very long whereas the footprints i wish to describe are embedded in my mind i hasten to add however that the stories are fictional i probably have met some people like those in the stories and perhaps at some subconscious level they are real but my stories are a work of fiction i cannot honestly say where they come from they seem to pop up out of nowhere

a prospector searching for gold deep in western australia s desert wilderness enters a cave and encounters a searcher of a very different kind

how to interpret meteorological measurements made at a given level over a surface with regard to characteristic properties such as roughness albedo heat moisture carbon dioxide and other gases is an old question which goes back to the very beginnings of modern micrometeorology it is made even more challenging when it is unclear whether these measurements are only valid for this point region and precisely describe the conditions there or if they are also influenced by surrounding areas after 50 years of field experiments it has become both apparent and problematic that meteorological measurements are influenced from surfaces on the windward side as such extending these measurements for inhomogeneous experimental sites requires a quantitative understanding of these influences when combined with atmospheric transport models similar to air pollution models the footprint concept a fundamental approach introduced roughly 20 years ago provides us with information on whether or not the condition of upwind site homogeneity is fulfilled since these first models the development of more scientifically based versions validation experiments and applications has advanced rapidly the aim of this book is to provide an overview of these developments to analyze present deficits to describe applications and to advance this topic at the forefront of micrometeorological research

nowhere have recent environmental and social changes been more pronounced than in post soviet siberia donatas brandišauskas probes the strategies that orochen reindeer herders of southeastern siberia have developed to navigate these changes catching luck is one such strategy that plays a central role in orochen cosmology luck implies a vernacular theory of causality based on active interactions of humans non humans material objects and places brandišauskas describes in rich details the skills knowledge ritual practices storytelling and movements that enable the orochen to catch luck or not sometimes to navigate times of change and upheaval
